

NATROX[®]

Oxygen Wound Therapy

DESIGNED
SIMPLY TO
HEAL
WOUNDS

No compromises.
Just results.

HEALS

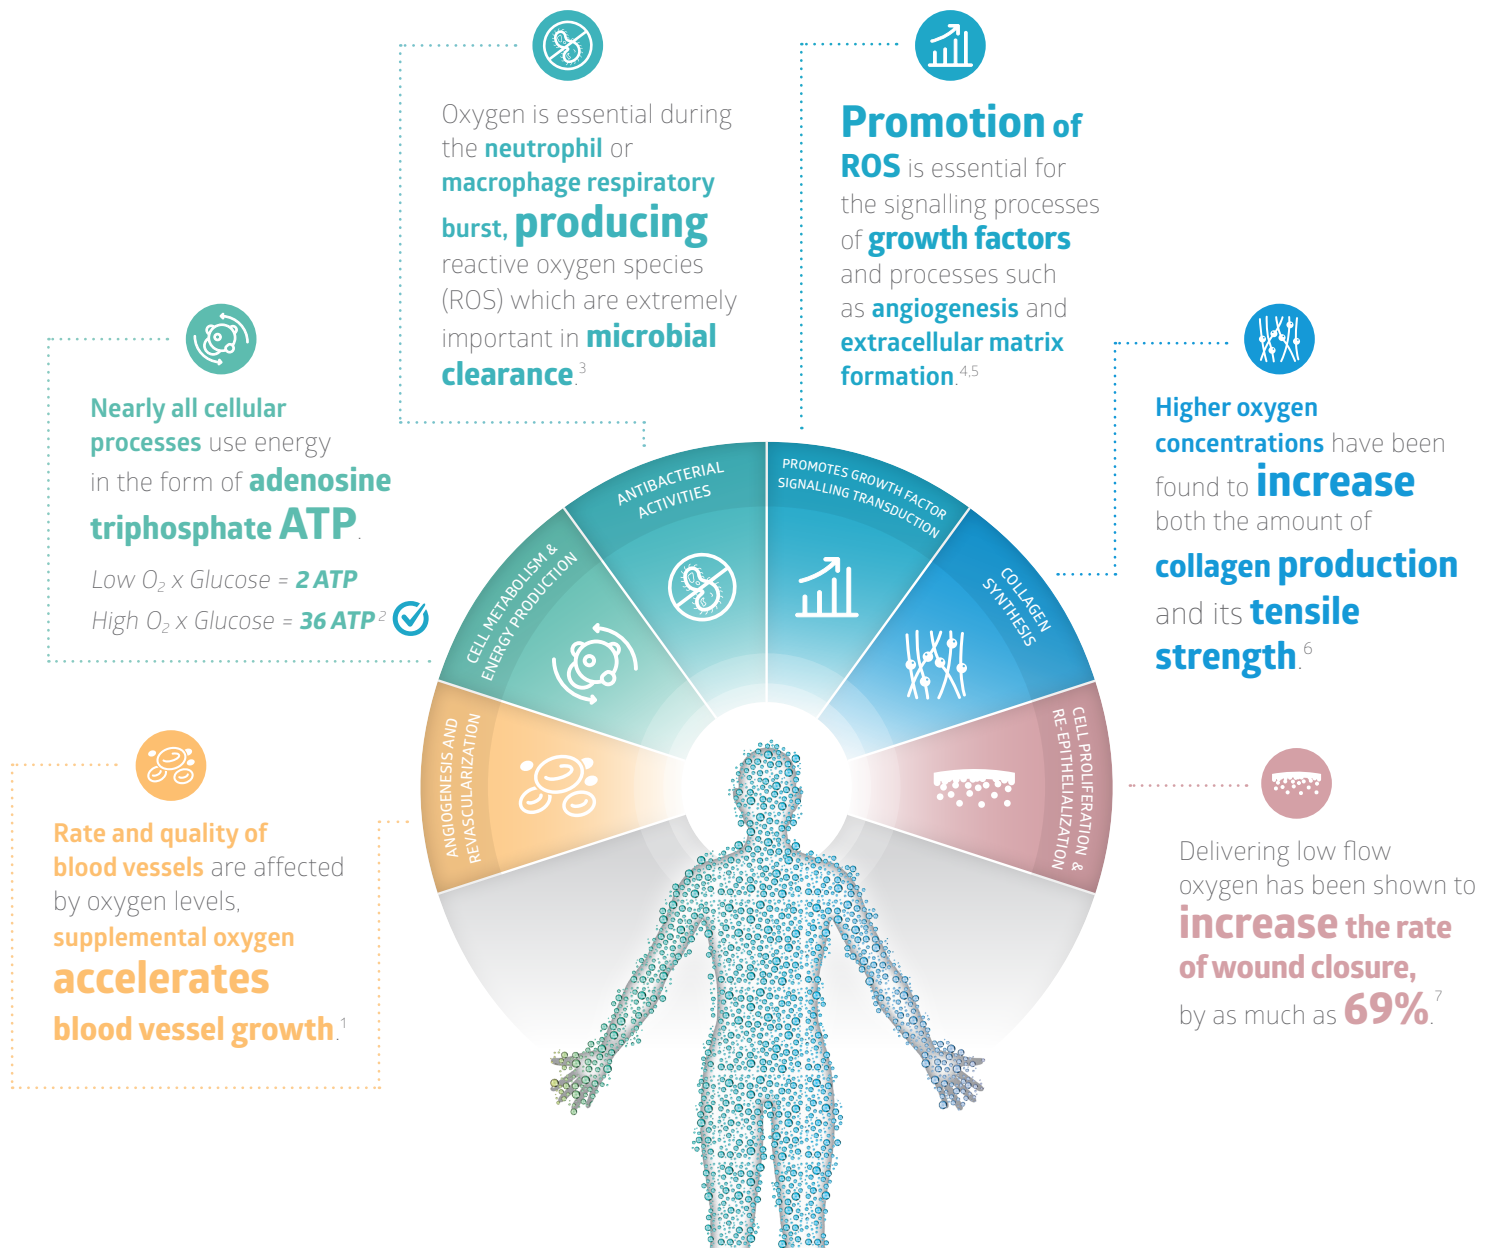

SIMPLE
DESIGN

DESIGNED
FOR PATIENTS

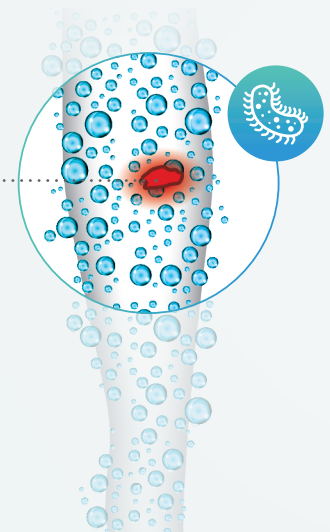

THE ROLE OF OXYGEN IN WOUND HEALING

THE BOTTOM LINE: Wounds need **oxygen to heal**

The presence of a wound **increases the body's need for oxygen by 20%**¹⁰

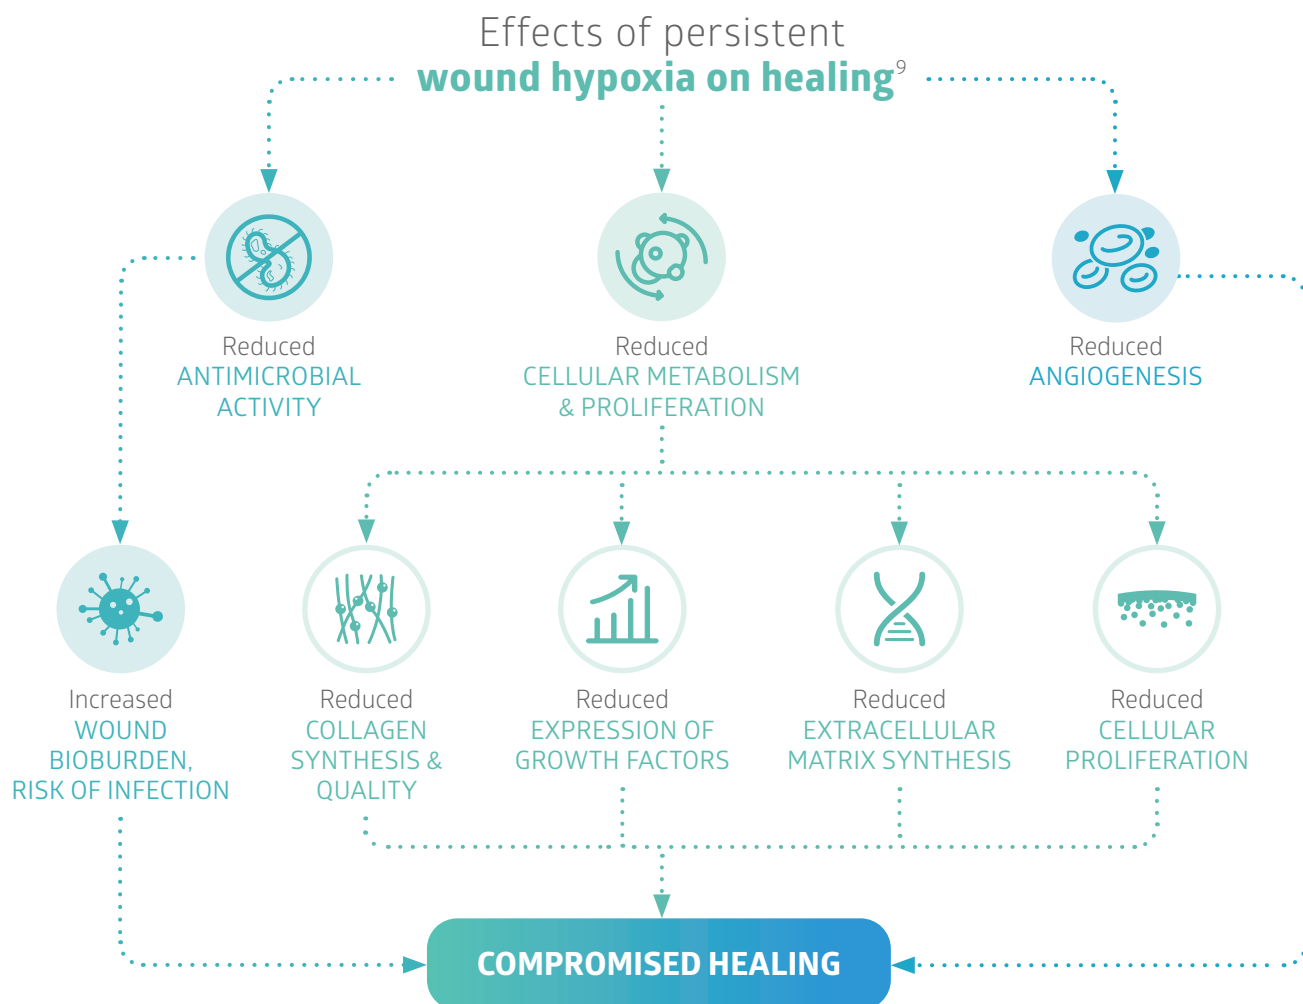

An infected wound **increases the body's need for oxygen by 50%**¹⁰

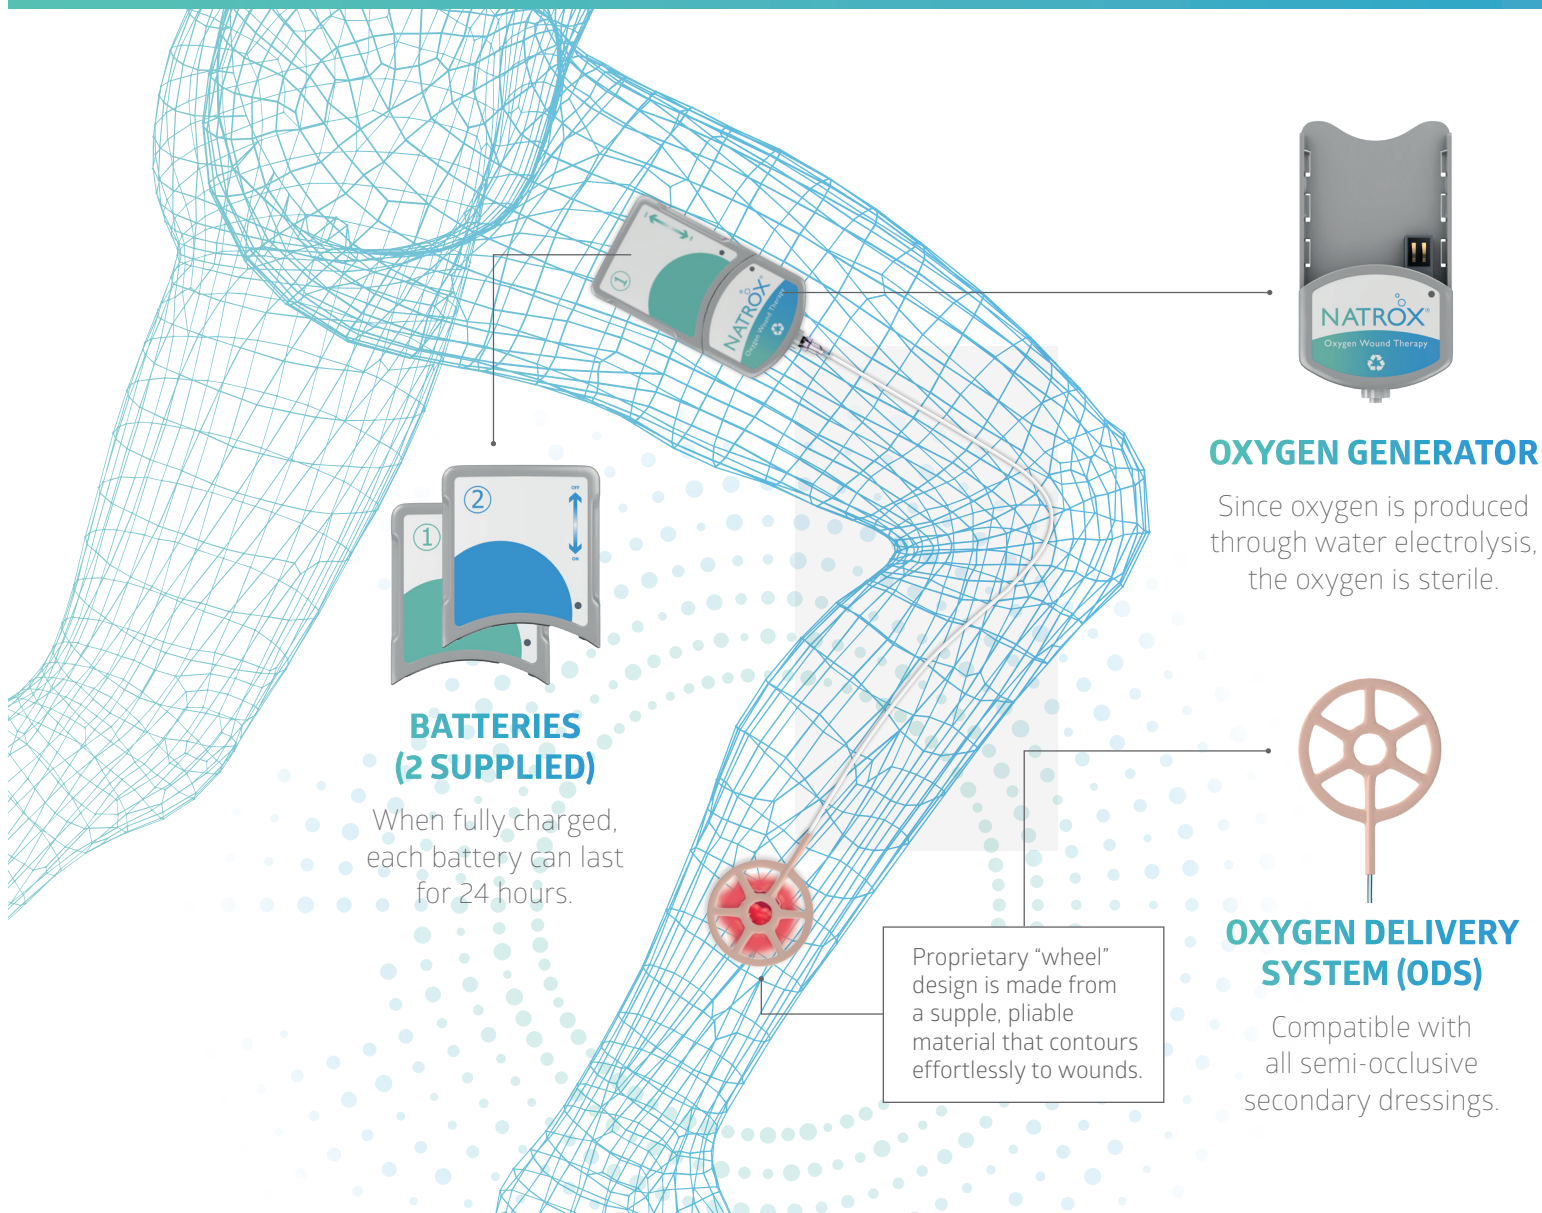

WOUNDS

AND THE INCREASED NEED FOR OXYGEN

Wound hypoxia acts as the initial stimulant to begin the process of wound healing. Chronic hypoxia cannot sustain the process.⁸

INTRODUCING NATROX® O₂

THE BOTTOM LINE: NATROX® O₂ can **help heal** complex, slow healing, c

WOUNDS THAT
COULD BENEFIT

**DIABETIC
FOOT ULCER**

LEG ULCER

**PRESSURE
INJURY**

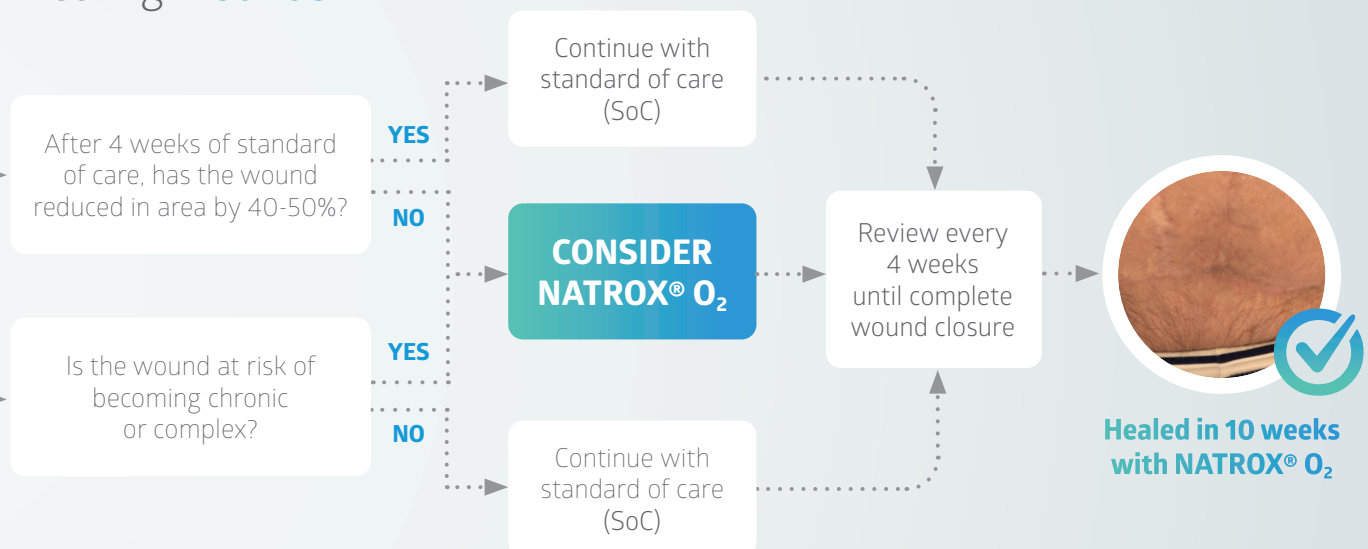

**NON-HEALING
SURGICAL WOUND**

KEY BENEFITS & PRACTICAL APPLICATION

g, or non-healing **wounds**

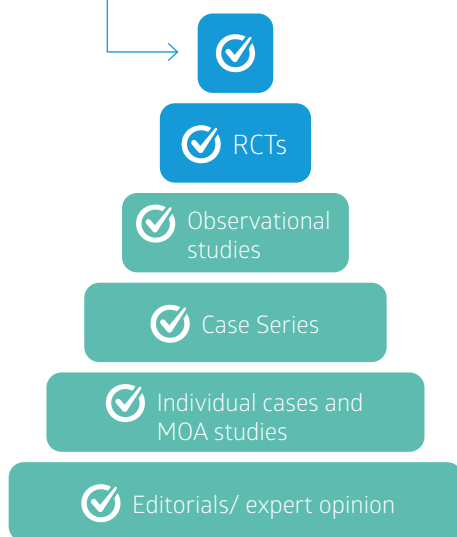

Modified from Treatment pathway in practice¹⁸

NATROX® O₂

CLINICAL EVIDENCE OF WOUND HEALING

Evidence Pyramid

Systematic reviews and meta-analyses of RCTs

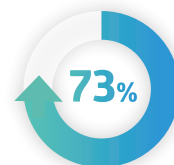

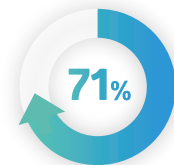

Randomised Control Trial – 145 patients

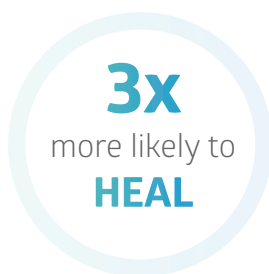

Previously non-healing diabetic foot ulcers

NATROX® O₂ achieved a P-value for both healing and wound reduction when compared to control.¹⁹

* Per protocol group
**Compared to control

Healed

Non-Healed

90% of DFUs healed after 8 weeks of NATROX® O₂ Therapy compared to just 30% in the control group²⁰

THE BOTTOM LINE: Chronic wounds pose a **significant burden** to both patients and healthcare systems.

This is why

18% of global wounds are **considered chronic**,²⁴ but account for **60%** of all **wound care costs**.²⁵

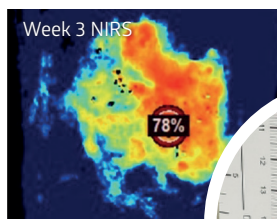

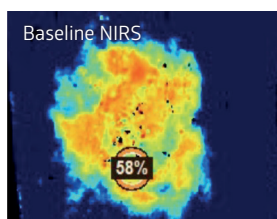

Rates of recurrence are as high as **70%** at one year²² and lower extremity **amputation** is often **inevitable**.²⁶

Pain is often expressed to be the **worst aspect** of having a wound. More than **80% of patients** with a chronic wound reported having **pain at all times**.²⁷

Meta-analysis suggests that topical oxygen therapy **significantly increased** the likelihood of **healing**.²⁸

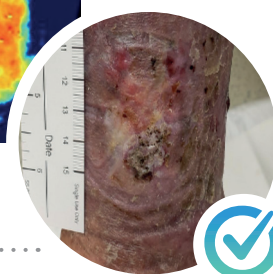

Improved oxygenation and wound healing²¹

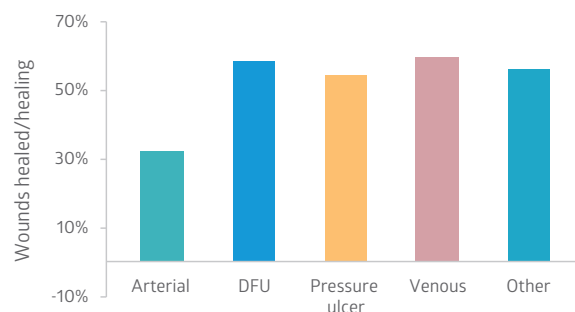

All patients experienced an increase in oxygenated haemoglobin at the wound bed within 3 weeks of NATROX® O₂ therapy. All wounds went on to heal completely.

**31%
AVERAGE
INCREASE**

in tissue
oxygenation

The majority
of wounds
**DECREASED
BY >50%**²²

200-patient study demonstrated wound healing in a variety of chronic wounds when treated for >25 days with NATROX® O₂

in patients and the healthcare systems worldwide²³

How NATROX® O₂ helps

85% of patients treated with topical oxygen **remained healed** at 1 year.²⁹

Amputation rates are **significantly lower** when continuous topical oxygen is used in conjunction with standard of care.³⁰

Painful ulcers:
76% felt rapid pain relief
69% stopped opioids
53% became pain free³¹

**HEALING
WITHOUT
COMPROMISE**
